DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Species of Figs. 1 and 5 drawn to an apparatus and a method of restoring a phase according to the first embodiment as disclosed in **(Brief description of drawings)** and on **(Page 22 Lines 17 –27 through line 15 on page 23)** of the specifications.

II. Species of Figs. 9 and 11 drawn to an apparatus and a method of restoring a phase according to the second embodiment as disclosed in **(Brief description of drawings)** and on **(Page 33 Lines 15 through Page 35 Line 15)** of the specifications.

III. Species of Figs. 12 and 16 drawn to an apparatus and a method of restoring a phase according to the third embodiment as disclosed in **(Brief description of drawings)** and on **(Page 39 Lines 7 –26)** of the specifications.

IV. Species of Figs. 18 and 19 drawn to an apparatus and a method of restoring a phase according to the fourth embodiment as disclosed in **(Brief description of drawings)** and on **(Page 45 Lines 18 through Page 49 Line 9)** of the specifications.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and **a listing of all claims readable thereon, including any claims subsequently added.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
